Up to Date

- Area D Roofing Installation 95% Complete
- Fireproofing Area D Penthouse Complete
- Structural Steel Area D Lecture Halls Complete

In the Now

- Area D interior CMU Walls Ongoing
- Area C Exterior Framing and sheathing
- Steam Line Ongoing
- Waterproofing Area D
- Area A in slab electrical rough-in
- Area A Elevated Slab Pours
- Exterior Masonry Area D

A Look Ahead

- Area B and D Concrete Column Encasement
- Plenum Installation in Penthouse
- Area A Slab on Grade Pour

The Breakdown

Above; The first brick of the new science building is being placed, a major milestone which begins exterior veneer. After this first brick is placed there are approximately 110,00 left to go.

Bellow; Metal panels on the North side of Area D make their way across the building. These metal panels are part of a curtain wall system with glass filling in the voids between the panels shown.

Above; A view from the air looking north across the building. Roofing installation is progressing from Area D and into C, exterior sheathing also making its way around the structure, and waterproofing following. This view also shows the horseshoe shape of the building and how construction advances in the order of Area D, C, B, and A respectively.
