

Interview Prep

- **Big Interview**

- Interview Curriculum
 - Students have the ability to conduct a mock interview on the Big Interview platform where they can practice their interviewing skills. They are able to choose their own questions for all experience levels and multiple industries.
 - Students will need to create a Big Interview account [here](#) using their MTSU email.
- Faculty Assignment
 - Faculty can create an assignment on the Big Interview platform where every student completes the same set of mock interview questions. Faculty will have the ability to watch each student's answers to each interview question and provide feedback.
 - Faculty will need to create an account [here](#) and receive admin access from the Career Development Center in order to create an assignment on Big Interview. Contact career@mtsu.edu once you have created an account to receive admin access.
 - Please utilize the [Help Center](#) for questions on creating, submitting, and reviewing assignments.
- Students can use Big Interview on a laptop or desktop computer **with a camera and microphone** or by downloading the Big Interview App on their smartphone or tablet. If a student does not have access to either of these, or wants a quiet place to complete the interview, we have space available in our office.

- **Mock Interview Assignment**

- Career Advisor
 - Students can make a mock interview appointment with their designated [Career Advisor](#)
 - What to bring to the appointment:
 - Revised resume
 - Job posting in desired field (hypothetical)
 - Professional dress is suggested but not required
 - The Career Advisor will provide feedback for the student or can fill out a rubric provided by the faculty. It is up to the faculty if they wish to create a follow up reflection assignment.
- Employers
 - Contact our Recruitment and Technology Coordinator at audrey.kee@mtsu.edu for more information about on-campus interviews for specific fields. We have an interview ready space on the third floor in the KUC where employers can host interviews.
